Policy & Procedure Manual

# LOCAL APPLICATION OF COLD: COMPRESS OR PACK – R-VI-12

## **POLICY:**

Cold as a therapeutic measure shall be applied as a compress or pack.

### PURPOSE:

- To reduce blood flow to the area and to prevent swelling.
- To relieve pain.
- To prevent edema resulting from sprains, strains or contusions.
- To decrease tissue metabolism and reduce inflammation.

#### PROCEDURE:

#### Ice Pack:

- 1. Wrap the ice pack in a towel and apply it slowly to the area to be treated. Hold the ice pack in place or encourage the client to do so.
- Observe the client's response throughout the treatment. Look under the pack approximately every 5 minutes noting general condition, presence of swelling or bleeding.
- 3. Continue treatment for the required amount of time as tolerated by the client. Usual time is up to 15 minutes.
- Document effectiveness on client's casebook.
- 5. If ineffective, repeat in 15 minutes time as tolerated.
- Seek medical attention if necessary.
